FOREWORD BY ORGANISING CHAIRMAN

Welcome to APOC2010 - an event host by the Faculty of Mechanical Engineering, Universiti Teknologi Malaysia (UTM). With a projected capital expenditure of over US\$97 billion from 2009 to 2013, the Asia-Pacific region is expected to witness an increase of 77% when compared to the previous five-year period. Energy analysts have forecasts a rapid growth and development of the offshore oil and gas market in Asia Pacific compared to other regions in the world. The Asian market is becoming more diverse and sophisticated, attracting more investment and is seeing an increase in capacity and assets. The capital investment is expected to peak in 2009 and 2011 with around US\$15 bn in each year. The next five years will be also characterised by the emergence of the deep and ultra-deepwater activity which will be the main impetus for the forecast global growth through to 2012. It is expected that 36 fields with a total of 7,915 mmbob will come on stream in water depths of 500 metres and greater. This is mostly due to the increased deepwater activity in ASEAN region.

A major challenge to achieving zero incidents thus protecting the environment is adaptation of new techniques and equipments by the drilling workforce. To gain a better understanding of the operational challenges and approaches to sustaining optimum operational results, industry leaders will share perspectives on their companies and solutions to the deep-water challenges. APOC2010, whose theme is "Challenges in Deepwater Exploration," will provide timely insight into the unique challenges of the Asian offshore arena – growth opportunities and changing operating conditions. This high-level and multi-discipline conference will feature high-ranking and distinguished chairs and speakers from across the globe, addressing more than 200 conference delegates with cutting-edge ideas and technical solutions for the industry. Apart from advances in technology it will also discuss current issues such as management and operation plus legal issues.

KEYNOTE SPEAKERS

ATILLA INCECIK, is the Professor of Offshore Engineering and Head of Department of Naval Architecture and Marine Engineering at the University of Strathclyde, United Kingdom.

Professor Incecik obtained his BSc in Naval Architecture and Marine Engineering in 1975 from the Technical University of Istanbul and his PhD in Ocean Engineering in 1982 from the University of Glasgow. He has been involved with teaching and research concerning the theoretical and experimental hydrodynamics and hydro-mechanics of floating offshore structures over the last thirty-three years. Professor Incecik has published over 80 papers in his area of research during the last 10 years. He was Lloyd's Register Professor of Offshore Engineering and Head of School of Marine Science and Technology at the University Newcastle upon Tyne between May, 1996 and September, 2007. Professor Incecik was Chairman (2002-2005) and member (2005-2008) of the Executive Committee of the International Towing Tank Conference. He is currently Editor-in-Chief of Ocean Engineering.

STEVE BALINT PE, M.ASCE, D.OE, is currently Project Delivery Manager with Sabah Shell Petroleum Company Ltd. He joined Shell Oil Company in 1980 and has worked in the offshore arena ever since. He holds degrees in Civil Engineering from Virginia Tech and Tulane University. Steve has experience in the design and project management of fixed, floating and arctic production systems, and has been active in API, ASCE and OTC, where he is currently a member of the board.

ASIA PACIFIC OFFSHORE CONFERENCE AND EXHIBITION

Challenges in Deepwater Oil & Gas Industry

APOC 2010

INTRODUCTION

The marine and offshore industries have gone through innovative development over last few years. This industry is expected to strengthen in the coming years. Exploration of new oil and gas fields has now shifted towards deeper water. The demand for Floating Production Storage And Offloading (FPSO) and other types of floating platforms have thus increased.

This premiere Asia Pacific Offshore Conference And Exhibition (APOC 2010) aims to promote interaction between experts from around the globe, particularly those from the Asia Pacific rim. APOC 2010 will specifically addresses "Challenges in Deepwater Oil And Gas Industry".

SCOPE

APOC 2010 aims to cover the following fields:

- Offshore Design & Analysis
- Offshore Environment
- Construction & Installation
- Hazard & Operability
- Subsea Systems, Pipe Lines & Risers
- Legal & Management Issues MS TO
