Introduction

The rapid and continuous growth of information and communication technology (ICT) has changed the way society and businesses communicate and behave. In 1980's, people and businesses used computers for typing purposes and processing data. Today, Internet, wireless and mobile technologies are used widely. It has led to performing transactions virtually, remotely and promoting the use of hand-held devices. With the emergence of IT-based or digital economy, the term "Digital Ecosystems" has been recognized as a center of discussion for future advanced ICT-based economy.

Taking the opportunity of the rapid and continuous growth of ICT, the Information Systems Department, Faculty of Computer Science and Information Systems, Universiti Teknologi Malaysia (UTM) has embarked to organize the International Conference on Research and Innovation in Information Systems (ICRIIS'09).

Conference Theme

The theme for the first ICRIIS'09 is "K-Communities through Digital Ecosystem". This theme is chosen in realization that it inspired multi-disciplinary IS research and innovation areas such as Social Computing and K-Community, Enterprise Computing, IT Adoption and Impact, Electronic Services, IT Governance as well as fundamental IS research.

Conference Objective

The main objective of ICRIIS'09 is to provide a platform for researchers, academicians, professionals, government and private sectors from all over the world to present their research result and innovation in the field of Information Systems and ICT.

Conference Tracks

ICRIIS'09 offers six main tracks for paper submission. ICRIIS'09 welcomes contributions in areas including but not limited to:

SOCIAL COMPUTING AND K-COMMUNITY

- Social Integration And Networks
- Social Network Analysis And Methodologies
- Social Network Services And Technologies
- Cognitive Interfaces
- Human Collectives Intelligence
- Social Information Processing
- User And Social Profiling
- Knowledge Networking, Mapping And Modeling
- Knowledge Innovation And Discovery
- Human-centered Collaborative Platform
- Social Interactivity And Virtuality
- Privacy And Security In Social Computing

ENTERPRISE COMPUTING

- Enterprise Application And Integration
- Database And Data Warehousing
- Decision Making
- Green Computing
- Information Systems And Applications
- Knowledge Management
